Summary

AI/ML Engineer with hands-on experience building intelligent applications using Python, LLMs, LangChain, RAG, FastAPI, and React. Experienced in developing AI-powered solutions for legal analysis, academic research, and recommendation systems.

Education

Bennett University — Greater Noida, Uttar Pradesh
B.Tech in CSE, AI Specialization (CGPA: 8.65) — *Sept 2022 – May 2026*

St Xavier's School — Shahbad Daultapur, New Delhi
Senior Secondary (XII), Computer Science (91%) — *2008 – May 2021*

Projects

AI Research Assistant | React,FastAPI,LangChain,Groq,ChromaDB,TypeScript,Python
Demo | GitHub

- Engineered a full-stack AI research assistant with 8+ AI-powered modules using Retrieval-Augmented Generation (RAG).
- Designed a FastAPI backend with LangChain orchestration and ChromaDB vector search and deployed the application on Render.
- Built 7+ REST APIs supporting PDF/arXiv ingestion and automated citation generation in 5 academic formats.

Movie Recommendation System (CinemaScope) | Python, Streamlit, KNN, OMDB API, BS4
Demo | GitHub

- Implemented a KNN-based recommendation system processing 5,043 IMDb records with movie and genre-based recommendations.
- Implemented feature engineering using genre one-hot encoding, IMDb scores, and OMDb API with BeautifulSoup fallback.
- Deployed a Streamlit application with 2 recommendation modes, dynamic filters, and cloud hosting on Render.

LawSage.AI | Python, Flask, JavaScript, PyTorch, Hugging Face, OCR, Azure VM
Demo | GitHub

- Developed an AI-powered legal assistant with OCR-enabled document summarization.
- Benchmarked multiple LLMs and migrated from Phi to LLaMA/Mistral models, reducing response latency by ∼40% to ∼60% in some cases.
- Deployed the system on an Azure Virtual Machine ensuring production-grade reliability and availability.

Technical Skills

Languages: Python, Java (OOP), JavaScript, TypeScript, C++
ML & AI: Machine Learning, NLP, LLMs, LangChain, RAG, OCR, Prompt Engineering, Model Benchmarking
Frameworks & Libraries: FastAPI, Flask, React, LangChain, Streamlit, BeautifulSoup, NumPy, Pandas, Matplotlib
Databases & Tools: MySQL, ChromaDB, SQLite, Git, GitHub, Render, JIRA

Certifications and Achievements

Research Paper: Comparative Analysis of Deep Neural Networks for Cardiovascular Risk Prediction — Presented at the 16th IEEE International Conference on Computing, Communication and Networking Technologies (ICCCNT 2025), IIT Indore. (Certificate)

Generative AI with Large Language Models – DeepLearning.AI, AWS (Certificate)

Natural Language Processing with Classification and Vector Spaces – DeepLearning.AI (Certificate)

Improving Deep Neural Networks: Hyperparameter Tuning, Regularization – DeepLearning.AI (Certificate)
